

Abstract of the Disclosure

The present invention relates to a compound represented by the general formula (I);

(wherein R^1 represents substituted or unsubstituted alkanoyl, substituted or unsubstituted aroyl, substituted or unsubstituted heteroarylcarbonyl, substituted or unsubstituted alkoxycarbonyl, substituted or unsubstituted aryloxy carbonyl, substituted or unsubstituted heteroaryloxy carbonyl or a hydrogen atom; R^2 represents hydroxy, substituted or unsubstituted alkoxy, or substituted or unsubstituted amino; and A represents a peptide sequence comprising a partial amino acid sequence having at least 12 continuous residues in the sequence of the dimerization region or DNA binding region of the E2F family); or a pharmaceutically acceptable salt thereof.
